Career History

Technology Consulting Firm, Colombia

Senior Salesforce Developer

March 2026 – Current

Project: Healthcare / Insurance sector client – Argentina — Agentforce

Responsibilities:

- ✓ Developed and implemented Salesforce solutions using Apex, Flows, Platform Events, and Invocable Actions to automate business processes.
- ✓ Configured, maintained, and continuously enhanced the Agentforce agent, including implementing new Actions, updating agent instructions (prompts), and optimizing its overall behavior and performance.

- ✓ Supported a Round Robin Lead assignment process to ensure fair Lead distribution among sales advisors, including automated notifications.
- ✓ Optimized SOQL queries, asynchronous processes, and Apex logic by applying Salesforce best practices, scalability principles, and Governor Limits.
- ✓ Developed unit tests, technical documentation, and provided ongoing functional and technical support for the Agentforce solution, collaborating closely with Business, QA, and Product Owner teams throughout the development lifecycle.

Tools/Technologies: Salesforce Platform, Agentforce, Apex, SOQL, Lightning Flow, Platform Events, Invocable Actions, Custom Notifications, JSON, Git, Visual Studio Code, Salesforce CLI (SFDX), Developer Console, Jira, ChatGPT.

Technology Consulting Firm, Colombia
Senior Salesforce Developer

July 2025 – December 2025

Project: Retail sector client – México — Field Services

Responsibilities:

- ✓ Designed and implemented an end-to-end solution to upload files to Apigee from multiple channels (LWC, REST APIs, and Apex), reducing duplicated logic and improving maintainability.
- ✓ Developed and exposed RESTful web services to be consumed by external providers, ensuring secure integrations, access control, and transaction traceability.
- ✓ Implemented Apex Triggers for the automatic assignment of Work Orders to specific suppliers based on complex business rules.
- ✓ Developed Apex service classes to consume external systems, enabling agenda consultation and updates to orders and related order products.
- ✓ Actively supported and led implementation activities across all environments (DEV, Staging, UAT), collaborating with the team to stabilize releases, paying attention to detail, and helping to ensure that everything was delivered on time.
- ✓ Worked under SCRUM methodology, managing tasks and incidents through Jira.
- ✓ Develop test classes and documentation for those classes with the help of artificial intelligence tools.

Tools/Technologies: Salesforce Field Service, Apex, SOQL, LWC, JavaScript, REST API, Triggers, Git / Bitbucket, Jenkins, Visual Studio Code, Jira, Internal Enterprise AI Assistant, ChatGPT

Technology Consulting Firm, Colombia
Senior Salesforce Developer

March 2025 – April 2025

Project: Automotive sector client – México — Incentives Program

Responsibilities:

- ✓ Adapted and customized commercial incentive modules for an automotive-sector client.
- ✓ Refactored and optimized existing components to improve performance and maintainability.
- ✓ Implemented business-requested enhancements in Aura Components and Apex.
- ✓ Managed data configuration, including objects, fields, relationships, and automation using Flows.

Tools/Technologies: Salesforce, Apex, SOQL, Flows, Aura Components, Visual Studio Code

Technology Consulting Firm, Colombia
Senior Salesforce Developer
Project: International client – México

January 2025 to February 2025

Responsibilities:

- ✓ Developed Apex classes for agent-force systems supporting origin and destination search processes.
- ✓ Configured Salesforce data model elements including objects, fields, relationships, and permissions.
- ✓ Ensured solution quality through proper use of SOQL and platform best practices.

Tools/Technologies: Salesforce, Apex, SOQL, Flows

Technology Consulting Firm, Colombia
Senior Salesforce Developer
Project: Banking sector client – Perú

March 2024 to December 2024

Responsibilities:

- ✓ Developed new components and features for a pricing calculator used by the business.
- ✓ Developed batch and scheduled jobs to update data according to business rules.
- ✓ Enhanced and maintained internal Salesforce developments aligned with banking requirements.
- ✓ Provided support for existing customizations and continuous improvements.
- ✓ Performed data management and configuration of objects, fields, relationships, and security.

Tools/Technologies: Salesforce, Apex, SOQL, Flows

Financial Services Company, Colombia
Senior Salesforce Developer

February 2023 to March 2024

Responsibilities:

- ✓ Developed Salesforce solutions to automate the Credit Ratification process.
- ✓ Implemented integrations with legacy systems using SOAP and REST APIs.
- ✓ Supported and optimized existing Salesforce customizations to improve operational efficiency (Visualforce, Batch and Schedule jobs).
- ✓ Developed integrations for customer validation services.
- ✓ Migrated multiple Salesforce Classic pages to Salesforce Lightning Experience.

Tools/Technologies: Salesforce, Apex, SOQL, Visualforce, SOAP, REST API, Git

Education Services Company, Bogotá, Colombia (multi-country operation: LATAM & APAC)
